Art Unit: 3731

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-6, 8 and 9, drawn to a method for applying a protective coating for a stent delivery system, classified in class 427, subclass 2.1.

II. Claims 7 and 10-14, drawn to a stent delivery system, classified in class 623, subclass 1.11.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make other and materially different product. For example, it could be used to make a stent which does not have the specific locking elements defined in claim 10.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3731

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
